REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant invention has been deemed to be an unobvious improvement over U.S. Patents 5038634 to Matsuto et al and 4916901 to Hayashi et al. Matsuto et al and Hayashi et al each disclose a swash plate plunger hydraulic unit having a rotatably supported cylinder having a plurality of axial plunger holes, a plurality of plungers in the holes, a swash plate having a face in contact with the plungers, and a swash plate servo device for tilting and rotating the swash plate having a screw shaft with a male screw, a nut member with a ball thread mated to the male screw, a servo drive device for driving the screw, and a stopper plate having a flange portion for contacting the side face of the nut member at the limit position (Figs. 8 and 2, respectively). The unobvious improvement includes having the stopper include a cylindrical ring portion having a diameter smaller than that of the flange portion and situated at a limit position of the nut member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
